ELEPHANT NOT CLEVER.

The Popular Belief Contradicted by an

English Writer. The elephant possesses very charming characteristics and makes a very pleasant companion. For one thing he 12.00 Noon. The accommodations will is not easily mislaid, and he is very be first-class in ever particular. Ele- obedient to the slightest hint given by

In speed he is scarcely a record breaker, but he can get over the ground in Jetroit and the Michigan Central Rail- his shuffling way at the rate of 15 miles an hour, when he likes.

There is one thing that he is not-he elephants for the purpose of capture.

All the actions which are apparently spontaneous on the part of the working elephant are really performed at the address the undersigned and a descrip- bidding of the mahout. The driver on his neck directs every movement by pressure of the knee, and as the man's knees are concealed under the elephant's ears it is very easy to imagine that the elephant thinks for himself.

After his tractability his gentleness is the elephant's most marked characteristic. The go down was a huge palisade shed, covering over an acre and was full of loose paddy (unhusked rice) and stacks of bags and grain. For two nights himself among those stacks. Spearmen, posted round the palisade wall, kept him in, and one might have supposed 40 there instead of one mad one. LIFE IN THE POLAR SEAS.

Plenty of Bears, Birds and Narwhals. Millions of Fiddlers and Fleas.

It is evident, according to Nansen, that the waters of the polar seas are far from being deserted by living creatures. Wherever the sea is open or partially so seals, narwhals and birds abound, and on the heaps of ice near the edge of the water the bears are numerous. Under the ice marine animals are not wanting. .The explorers found in abundance little crustaceans, whose discovery was the result of an accident.

One day the cook sunk a piece of is a method often resorted to for the purpose of sparing the fuel. Forty-eight hours afterward, while taking out the The first of American Newspameat, the cook was astonished to find an immense number of little animals and commenced to jump about like fleas. The Roman Fisherman.

A traveler in Rome tells of a citizen R. With the aid of a pneumatic tube to shoot the fish from the bank to his house it would seem to be unnecessary for him to do even this. Nothing would be lacking then to complete his happiness but an electric broiler and possibly an automatic bone extractor. - Buffalc Commercial.

A Measure of Distance.

"How far is it from here to Brushburg?" asked a tourist of an old fellow who was heeing weeds in a field of sickly corn "down south." "Is it far?" "Waal, it hain't so very fer nor it ham't so very nigh. If you go raound by the big road, it's ferder nor it is nigh, but if you cut acrost country it's nigher nor it is fer, an if you keep right straight ahead it's kinder betwixt nigh an fer, but it's considerable of a ja'nt from hyar no matter how you git thar." -Harper's Bazar.
